HIGH PERFORMANCE ROULETTE IS MORE AFFORDABLE THAN EVER BEFORE

With a smaller footprint designed to accommodate limited spaces, MiniStar Roulette is the most compact, high-performance roulette device on the market today. Available with five, six, eight or ten seats with either a single or double-zero roulette wheel, the ergonomically designed MiniStar Roulette features super comfortable, techno-gel armrests, optional progressive jackpot systems and fast result detection. It supports bill acceptors, bill dispenser ticket printers, and coin-handling systems.

A FULLY AUTOMATED GAMING SYSTEM

MiniStar Roulette provides a multi-sensory experience that appeals to today's always-online generation – so you can attract a new, younger crowd to your establishment, while also providing established players a premium gaming experience. Its automated roulette generator delivers up to 150 results per hour, which means more betting revenue for the house.

- MiniStar String is composed of three Play Stations and is an innovative way to easily add and connect new play stations to an existing MiniStar Roulette on your floor!
- Single-Zero (0) Diamond Roulette (37 slots) – 2.70 % House Edge
- Double-Zero (00) Diamond Roulette (38 slots) – 5.26 % House Edge
- Unified power supply for 110V and 220V regions
- Fraud prevention system
- Live wheel and live ball generator
- Attractive Player Information Display
- Automated 10 ball changer

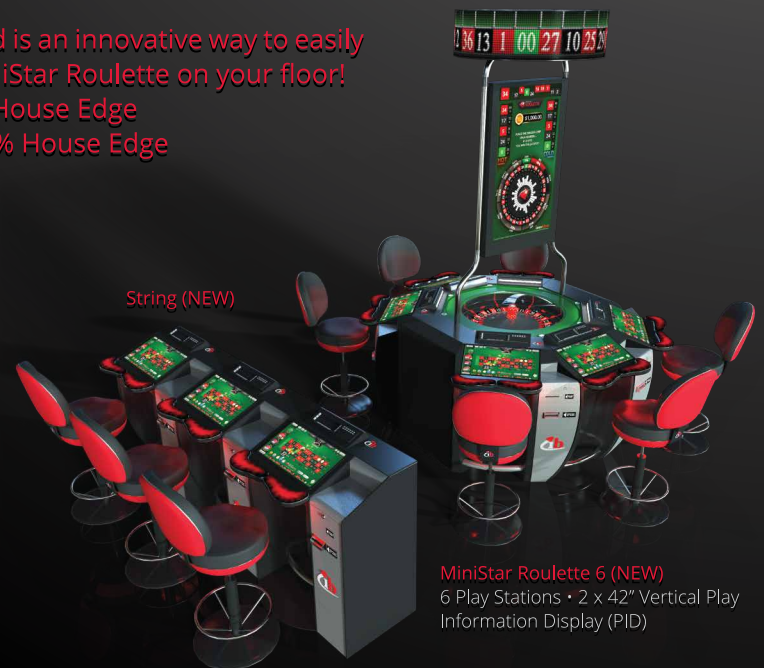

THE MINISTAR PLAY STATION

- A faster, more powerful graphical engine
- The strongest security available today
- Streamlined access for easy maintenance
- 18.5" Play Station screen

SIDE BETS ELEVATE PLAYER ACTION AND CASINO RETURNS

Side bets are popular with players and profitable for the house as they enable the casino to lower the percentage of return. MiniStar Roulette offers two exciting Side bets to keep players engaged:

- **Touchdown Roulette** — American Football action with stunning animation and sound. A result of 0 or 00 triggers Touchdown Roulette, which lasts four spins. The color of the result determines the football's direction (towards the Red or Black end zone). The higher the number, the more yards the football progresses. The closer the player gets to the end zone, the more the player wins.
- **Goal! Roulette** — International Football (soccer) action. A result of 0 or a repeated number triggers the game, which lasts three spins. The color of the result determines the ball's direction (towards the Red or Black goal). The higher the number, the more the ball advances. The further the player gets down field, the better the chances to score.
