

ROULETTE

THE NEXT GENERATION IN STATE-OF-THE-ART GAMING

Roulette is the most popular table game on the market today. Diamond Roulette takes player interaction to the next level, giving casinos, racinos, and gaming lounges an exciting new way to attract new players and “spin” more income.

- Unified power supply for 110V and 220V regions
- Enhanced fraud prevention
- Power Meter bonus system

SIDE BETS ELEVATE PLAYER ACTION AND CASINO RETURNS

- Touchdown Roulette
- Goal! Roulette

NEW PLAYERS, MORE REVENUE

As a standalone system or in a multi-player environment, Diamond Roulette provides a memorable, multi-sensory experience, especially appealing to today's always-online, wired generation — so you can attract a new, younger crowd to your gaming establishment. Additionally, the Diamond Roulette generator delivers up to 150 results per hour which means more betting revenue for the house.

THREE WAYS TO PLAY

Different jurisdictions often have different regulations regarding the types of gaming operations allowed. Diamond Roulette offers three modes of operation so you can comply with local standards:

- **Automated** — Automation has long been a driving force behind Interblock gaming devices. A fully automated, full-featured version of Diamond Roulette fits neatly in any casino or gaming hall, and is especially useful in venues where live, dealer-operated table games are not allowed.
- **Video** — A software generator drives the video version of Diamond Roulette, with computer-generated animation shown on an LCD display. No human assistance is required for simulating traditional table roulette.
- **Dealer Assist** — Diamond Dealer Assist Roulette lets players place wagers through individual Play Stations while the game is conducted on a semi-automatic roulette wheel manned and operated by a croupier.
